Risk Assessment Form (3)

Must be completed before experimentation.

Student's Name(s) Hannah Farley

Title of Project Characterization of Gxq Inhibitors for Uveal Melanoma Treatment

To be completed by the Student Researcher(s) in collaboration with Designated Supervisor/Qualified Scientist:
(All questions must be answered; additional page(s) may be attached.)

1. List all hazardous chemicals, activities, or devices that will be used; identify microorganisms exempt from pre-approval (see Potentially Hazardous Biological Agent rules).

   Chloroform

2. Identify and assess the risks involved in this project.

   There is little to no risk with this involved in the project

3. Describe the safety precautions and procedures that will be used to reduce the risks.

   Mount Sinai proper training along with the use of proper Personal Protective Equipment such as gloves and goggles as well as approproate clothing for precaution as well as Designated Supervisor supervision will handling machinery will be used to reduce risks.

4. Describe the disposal procedures that will be used (when applicable).

   Labeled containers for biological waste and sharp bins will be utilized to ensure the disposal of waste is done safely.

5. List the source(s) of safety information.

   Mount Sinai Safety Programs
   Mount Sinai Fire Safety and Emergency Video

To be completed and signed by the Designated Supervisor (or Qualified Scientist, when applicable):
I agree with the risk assessment and safety precautions and procedures described above. I certify that I have reviewed the Research Plan/Project Summary and will provide direct supervision.

Melisa Lopez-anton		07/01/19
Designated Supervisor's Printed Name	Signature	Date of Review (mm/dd/yy)

Post Doctoral Fellow	melisa.lopez-anton@mssm.org
