

Regulated Research Institutional/Industrial Setting Form (1C)

This form must be completed AFTER experimentation by the adult supervising the student research conducted in a regulated research institution, industrial setting or any work site other than home, school or field.

Student's Name(s) Dylan Schneider

Title of Project An Investigation into September 11th Related Post-Traumatic Stress Disorder and Anhedonic Depression

To be completed by the Supervising Adult in the Setting (NOT the Student(s)) after experimentation:

(Responses must be on the form as it is required to be displayed at student's project booth; please do not print double-sided.)

The student(s) conducted research at my work site:

1. Did you or your proxy (e.g. graduate student, postdoc, employee) mentor or provide substantial guidance to the student researcher? ☒ Yes ☐ No
 - a. If no, describe your and/or your institution's role with the student researcher and his/her project (e.g. supervised use of equipment on site without ongoing mentorship and sign below.
 - b. If yes, complete questions 2 - 5.
2. Is the student's research project a subset of your ongoing research or work? ☒ Yes ☐ No

Use questions 3, 4 and 5 to detail how the student's project was similar and/or different from ongoing research or work at your site.
3. Describe the independence and creativity with which the student:
 - a. developed the hypotheses or engineering goals for the research project
The student was given several possible options in terms of variables to study. He chose what he wanted to study and developed his own hypotheses.
 - b. designed the methodology for his/her research project
The student did this on his own.
 - c. analyzed and interpreted data
The student learned to use the proper data analysis software and approached me with any questions that he had

(Continued on next page)

Regulated Research Institutional/Industrial Setting Form (1C) Continued

Student's Name(s) Dylan Schneider

4. Detail the student's role in conducting the research (e.g. data collection, specific procedures performed). Differentiate what the student observed and what the student actually did.

The entirety of the project was completed by the student. The only similar aspect between our studies is that all current studies used the same data set. Data analysis as well as determining methodology was completely independent.

5. Did the student(s) work on the project as part of a group?
If yes, how many individuals were in the group and who were they (e.g. high school students, graduate students, faculty, professional researchers)?

☐ Yes ☒ No

I attest that the student has conducted the work as indicated above and that any required review and approval by institutional regulatory board (IRB/IACUC/IBC) has been obtained. Copies are attached if applicable.
I further acknowledge that the student will be presenting this work publicly in competition and I have communicated with the student research regarding any requirements for my review and/or restrictions of what is publicized.

Sean Clouston

Supervising Adult's Printed Name

Stony Brook University

Institution

101 Nicolls Rd. Stony Brook, NY

Address

Signature

Assistant Professor

Title

1/19/20

Date Signed (must be after experimentation) (mm/dd/yy)
