

## Risk Assessment Form (3)

Must be completed before experimentation.

Student's Name(s) Jonathan Leung

Title of Project Detection of Amyloid Plaques Targeted by USPIOs and ARIA Evaluation in a Non-Human Primate

Model of Sporadic Cerebral Amyloid Angiopathy (CAA)

**To be completed by the Student Researcher(s) in collaboration with Designated Supervisor/Qualified Scientist:**  
(All questions must be answered; additional page(s) may be attached.)

1. List all hazardous chemicals, activities, or devices that will be used; identify microorganisms exempt from pre-approval (see Potentially Hazardous Biological Agent rules).

Immunohistochemistry involved the use of hazardous chemicals including xylene, depex, and diaminobenzidine (DAB).

2. Identify and assess the risks involved in this project.

Risks involve the use of chemicals.

3. Describe the safety precautions and procedures that will be used to reduce the risks.

Lab standards require the use of gloves, masks, and lab coats when conducting experiments that require the use of hazardous materials. All chemicals are properly labeled and used chemicals are properly disposed.

4. Describe the disposal procedures that will be used (when applicable).

Glass, sharp objects, and hazardous chemicals are disposed in specific containers. All used chemicals are diluted before disposal.

5. List the source(s) of safety information.

Material Safety Data Sheet

**To be completed and signed by the Designated Supervisor (or Qualified Scientist, when applicable):**

I agree with the risk assessment and safety precautions and procedures described above. I certify that I have reviewed the Research Plan/Project Summary and will provide direct supervision.
