

Risk Assessment Form (3)

Must be completed before experimentation.

Student's Name(s) Matthew Amato, Catherine McNamara

Title of Project Creation of Carbon Neutral Feul Using Peanuts

To be completed by the Student Researcher(s) in collaboration with Designated Supervisor/Qualified Scientist:
(All questions must be answered; additional page(s) may be attached.)

1. List all hazardous chemicals, activities, or devices that will be used; identify microorganisms exempt from pre-approval (see Potentially Hazardous Biological Agent rules).

Methanol

2. Identify and assess the risks involved in this project.

Chemical exposure, Minimal risk when following safety procedure.

3. Describe the safety precautions and procedures that will be used to reduce the risks.

Wearing: goggles, gloves, lab coat, masks. Cleared the area of all flammable materials.
Conducted the experiment under the fume hood. Fisher SDS.

4. Describe the disposal procedures that will be used (when applicable).

N/A, all used within reaction.

5. List the source(s) of safety information.

Fisher SDS

To be completed and signed by the Designated Supervisor (or Qualified Scientist, when applicable):

I agree with the risk assessment and safety precautions and procedures described above. I certify that I have reviewed the Research Plan/Project Summary and will provide direct supervision.

Cody Onufrock
