

Risk Assessment Form (3)

Must be completed before experimentation.

Student's Name(s) Hammad Hassan

Title of Project Targeted inhibition of a novel MALT1 and MAPK signaling network synergistically suppresses aggressive B cell lymphoma growth

To be completed by the Student Researcher(s) in collaboration with Designated Supervisor/Qualified Scientist:
(All questions must be answered; additional page(s) may be attached.)

1. List all hazardous chemicals, activities, or devices that will be used; identify microorganisms exempt from pre-approval (see Potentially Hazardous Biological Agent rules).

Standard chemicals that are used in biochemical research, particularly those related to western blots.

2. Identify and assess the risks involved in this project.

Student is subjected to standard levels of risks in the lab.

3. Describe the safety precautions and procedures that will be used to reduce the risks.

Student would be wearing gloves and lab coat at all the times in the lab.

4. Describe the disposal procedures that will be used (when applicable).

All materials will be disposed through either the fume hood or sink.

5. List the source(s) of safety information.

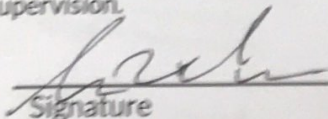

Weill Cornell Medical College's safety rules.

To be completed and signed by the Designated Supervisor (or Qualified Scientist, when applicable):

I agree with the risk assessment and safety precautions and procedures described above. I certify that I have reviewed the Research Plan/Project Summary and will provide direct supervision.

Jimmy Wilson

Designated Supervisor's Printed Name

Signature
