

Risk Assessment Form (3)

Must be completed before experimentation.

Student's Name(s) Seunguk Baek

Title of Project The Evaluation of the Therapeutic Potential of Orlistat in a Mouse Model of HHT

To be completed by the Student Researcher(s) in collaboration with Designated Supervisor/Qualified Scientist: (All questions must be answered; additional page(s) may be attached.)

1. List all hazardous chemicals, activities, or devices that will be used; identify microorganisms exempt from pre-approval (see Potentially Hazardous Biological Agent rules).

Dimethyl Sulfoxide, Triton-x-100, Sodium Dodesyl Sulfate, Acrylamide, Methanol, Orlistat, Nintendanib

2. Identify and assess the risks involved in this project.

Chemicals maybe harmful in swallowed, inhalation or eye/skin contact.

3. Describe the safety precautions and procedures that will be used to reduce the risks.

Use personal protective equipment. Wear appropriate protective eyeglasses or chemical safety goggles, gloves and lab coat at all times to prevent contact skin or eyes. Ensure adequate ventilation. Keep container tightly closed.

4. Describe the disposal procedures that will be used (when applicable).

Dispose of contents/container to an approved waste disposal plant.

5. List the source(s) of safety information.

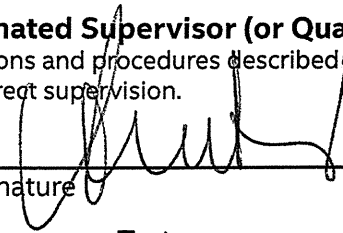

Materials safety data sheet.

To be completed and signed by the Designated Supervisor (or Qualified Scientist, when applicable):

I agree with the risk assessment and safety precautions and procedures described above. I certify that I have reviewed the Research Plan/Project Summary and will provide direct supervision.
