

## Regulated Research Institutional/Industrial Setting Form (1C)

This form must be completed AFTER experimentation by the adult supervising the student research conducted in a regulated research institution, industrial setting or any work site other than home, school or field.

Student's Name(s) Sarah Pomerantz

Title of Project The Effect of Structural Shapes on Fluid Flows in Fluid-Structure Interactions

**To be completed by the Supervising Adult in the Setting (NOT the Student(s)) after experimentation:**

(Responses must be on the form as it is required to be displayed at student's project booth; please do not print double-sided.)

The student(s) conducted research at my work site:

1. Did you or your proxy (e.g. graduate student, postdoc, employee) mentor or provide substantial guidance to the student researcher? ☒ Yes ☐ No
  - a. If no, describe your and/or your institution's role with the student researcher and his/her project (e.g. supervised use of equipment on site without ongoing mentorship and sign below).
  - b. If yes, complete questions 2-5.
2. Is the student's research project a subset of your ongoing research or work? ☒ Yes ☐ No

Use questions 3, 4 and 5 to detail how the student's project was similar and/or different from ongoing research or work at your site.
3. Describe the independence and creativity with which the student:
  - a. developed the hypotheses or engineering goals for the research project  
Since the student does not have any background in the area, the graduate mentor gave her specific goals to this project.
  - b. designed the methodology for his/her research project  
The student was able to learn methods to perform the software simulation for this project by her self from online resources.
  - c. analyzed and interpreted data  
The student was able to learn the technique to analyze and interpret the data completely by her self from online resources.

(Continued on next page)

**Regulated Research Institutional/Industrial Setting Form (1C)**  
**Continued**

Student's Name(s) Sarah Pomerantz

4. Detail the student's role in conducting the research (e.g. data collection, specific procedures performed). Differentiate what the student observed and what the student actually did.

In this research, the student performed simulation using a commercial CFD software and postprocess the data using a different open source software.

5. Did the student(s) work on the project as part of a group?  
If yes, how many individuals were in the group and who were they (e.g. high school students, graduate students, faculty, professional researchers)?

☐ Yes ☒ No

No. The student works on this project independently.

I attest that the student has conducted the work as indicated above and that any required review and approval by institutional regulatory board (IRB/IACUC/IBC) has been obtained. Copies are attached if applicable.  
I further acknowledge that the student will be presenting this work publicly in competition and I have communicated with the student research regarding any requirements for my review and/or restrictions of what is publicized.

Chen Shen

Supervising Adult's Printed Name

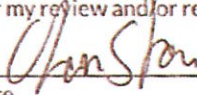

Rensselaer Polytechnic Institute

Institution

110 8th Street Troy, New York

Address

Signature

Graduate Student / Research Assistant

Title

1/19/2020

Date Signed (must be after experimentation) (mm/dd/yy)
