

## Potentially Hazardous Biological Agents Risk Assessment Form (6A)

Required for research involving microorganisms, rDNA, fresh/frozen tissue (including primary cell lines, human and other primate established cell lines and tissue cultures), blood, blood products and body fluids.  
SRC/IACUC/IBC approval required before experimentation.

Student's Name(s) **Maria Russotti**

Title of Project **Enhancement of Oxidoreductase Cofactor Systems for Enzymatic Activity with 3'NADP: A Novel Model for NAD-capped RNA**

To be completed by the **QUALIFIED SCIENTIST/DESIGNATED SUPERVISOR** in collaboration with the student researcher(s). All questions are applicable and must be answered; additional page(s) may be attached.

### SECTION 1: PROJECT ASSESSMENT

1. Identify potentially hazardous biological agents to be used in this experiment. Include the source, quantity and the biosafety level risk group of each microorganism.

**E. coli (DH5 alpha, BL21) from New England BioLabs**

2. Describe the site of experimentation including the level of biological containment.

**Lab in Mudd Building at Columbia University.**

3. Describe the procedures that will be used to minimize risk (personal protective equipment, hood type, etc.).

**Personal Protective Equipment, Bio Hood, Heat Proof Gloves**

4. What final biosafety level do you recommend for this project given the risk assessment you conducted?

**BSL-1**

5. Describe the method of disposal of all cultured materials and other potentially hazardous biological agents.

**Sprayed with detergent; Waste containers,**

### SECTION 2: TRAINING

1. What training will the student receive for this project?

**Student will receive safety training and will be trained on protocols**

2. Experience/training of Designated Supervisor as it relates to the student's area of research (if applicable).

**PhD student in Chemical Engineering working in a protein engineering lab**

### SECTION 3: For ALL CELL LINES, MICROORGANISMS AND TISSUES – To be completed by the QUALIFIED SCIENTIST or DESIGNATED SUPERVISOR – Check the appropriate box(es) below:

- ☐ Experimentation on the microorganisms/cell lines/tissues to be used in this study will NOT be conducted at a Regulated Research Institution, but will be conducted at a (check one) ☐ BSL-1 or ☐ BSL-2 laboratory. This study has been reviewed by the local SRC and the procedures have been approved prior to experimentation.

- ☐ Experimentation on the microorganisms/cell lines/tissues to be used in this study will be conducted at a Regulated Research Institution and was approved by the appropriate institutional board prior to experimentation; institutional approval forms are attached.

Origin of cell lines:

Date of IACUC/IBC approval

- ☐ Experimentation on the microorganisms/cell lines/tissues to be used in this study will be conducted at a Regulated Research Institution, which does not require pre-approval for this type of study. The SRC has reviewed that the student received appropriate training and the project complies with ISEF rules.

### CERTIFICATION – To be SIGNED by the QUALIFIED SCIENTIST or DESIGNATED SUPERVISOR

The QS/DS has seen this project's research plan and supporting documentation and acknowledges the accuracy of the information provided above. This study has been approved as a (check one) ☐ BSL-1/ ☒ BSL-2 study, and will be conducted in an appropriate laboratory.
