

Risk Assessment Form (3)

Must be completed before experimentation.

Student's Name(s) Suchir Misra

Title of Project Abstract text mining to create an exhaustive disease-disease correlation database

To be completed by the Student Researcher(s) in collaboration with Designated Supervisor/Qualified Scientist:
(All questions must be answered; additional page(s) may be attached.)

1. List all hazardous chemicals, activities, or devices that will be used; identify microorganisms exempt from pre-approval (see Potentially Hazardous Biological Agent rules).

There were no hazardous materials used in this project as it was entirely computational.

2. Identify and assess the risks involved in this project.

Due to this project being entirely computational, there were no risks involved.

3. Describe the safety precautions and procedures that will be used to reduce the risks.

There were no safety precautions and procedures needed as this project was entirely computational.

4. Describe the disposal procedures that will be used (when applicable).

There were no disposal procedures necessary since this project was entirely computational.

5. List the source(s) of safety information.

There were no sources of safety information necessary since this project was entirely computational.

To be completed and signed by the Designated Supervisor (or Qualified Scientist, when applicable):

I agree with the risk assessment and safety precautions and procedures described above. I certify that I have reviewed the Research Plan/Project Summary and will provide direct supervision.

Dr. Wentian Li

Designated Supervisor's Printed Name

Signature

06/24/19

Date of Review (mm/dd/yy)

Investigator, Feinstein Institute for Medical Research

Position & Institution

wli@northwell.edu/(516)-562-1076

Phone or email contact information

faculty member in the related field (computational biology)

Experience/Training as relates to the student's area of research
