Potentially Hazardous Biological Agents Risk Assessment Form (6A)

Required for research involving microorganisms, rDNA, fresh/frozen tissue (including primary cell lines, human and other primate established cell lines and tissue cultures), blood, blood products and body fluids.

SRC/IACUC/IBC approval required before experimentation.

	SRC/IACUC/IBC approval re	equired before experimentation.	
Student's Name(s)	sudent's Name(s) Raheem Sheikh		
Title of Project Anal	ysis of the Effect of the Herbicide, Glyphosate, on Parki	nson's Disease Related Gene Expression in Caenorhabditis elegans and Drosophila melanogaste	
	e QUALIFIED SCIENTIST/DESIGNATED ole and must be answered; additional pag	SUPERVISOR in collaboration with the student researcher(s). All ge(s) may be attached.	
SECTION 1: PROJECT 1. Identify potentially group of each micro	hazardous biological agents to be used in th	is experiment. Include the source, quantity and the biosafety level risk	
None 2. Describe the site of	f experimentation including the level of biolo	ogical containment.	
Work will be d 3. Describe the proce	one in a standard fume hood dures that will be used to minimize risk (pers	sonal protective equipment, hood type, etc.).	
Hood, use of 4. What final biosafet	f gloves, decontamination using simply y level do you recommend for this project gi	e soap and water ven the risk assessment you conducted?	
5. Describe the method	od of disposal of all cultured materials and ot	her potentially hazardous biological agents.	
	microorganisms will be disoposed of	via autoclaving	
	he student receive for this project?		
The student will 2. Experience/training	learn how to culture C. elegans and to g of Designated Supervisor as it relates to th	o perform molecular techniques e student's area of research (if applicable).	
DESIGNATED SUPER Experimentatio	VISOR - Check the appropriate box(es) belon on the microorganisms/cell lines/tissues to be used a (check one) ☐ BSL-1 or ☐ BSL-2 laboratory. This s	UES – To be completed by the QUALIFIED SCIENTIST or ow: In this study will NOT be conducted at a Regulated Research Institution, but will tudy has been reviewed by the local SRC and the procedures have been approved	
	nentation on the microorganisms/cell lines/tissues to be used in this study will be conducted at a Regulated Research Institution and was add by the appropriate institutional board prior to experimentation; institutional approval forms are attached. Ilines: Date of IACUC/IBC approval		
		in this study will be conducted at a Regulated Research Institution, which does d that the student received appropriate training and the project complies with ISEF	
CERTIFICATION - To	be SIGNED by the QUALIFIED SCIENTIST o	r DESIGNATED SUPERVISOR	
		nentation and acknowledges the accuracy of the information provided 2 study, and will be conducted in an appropriate laboratory.
