Potentially Hazardous Biological Agents Risk Assessment Form (6A) Required for research involving microorganisms, rDNA, fresh/frozen tissue (including primary cell lines, human and other primate established cell lines and tissue cultures), blood, blood products and body fluids. SRC/IACUC/IBC approval required before experimentation.

Student's Name(s) David Xiang	
Title of Project Heparin-Conjugated Bioactive Glue For Regeneration of	Lubricin-infiltrated Meniscus Tears by Recruitment of Stem/Progenitor Cells
To be completed by the QUALIFIED SCIENTIST/DESIGNATED SU questions are applicable and must be answered; additional page(IPERVISOR in collaboration with the student researcher(s). All
SECTION 1: PROJECT ASSESSMENT 1. Identify potentially hazardous biological agents to be used in this group of each microorganism.	experiment. Include the source, quantity and the biosafety level risk
Bovine meniscus tissues from local butcher shop 2. Describe the site of experimentation including the level of biologic	cal containment.
BSL-2; the site of research conduct is equipped wi 3. Describe the procedures that will be used to minimize risk (persor	• •
Personal protectives, chemical hoods, cell and tiss 4. What final biosafety level do you recommend for this project given	
BSL-2Describe the method of disposal of all cultured materials and othe All tissue samples will be disposed following policy	
 What training will the student receive for this project? The student intern will receive all necessary training how to use tissue culture hood and personal protec Experience/training of Designated Supervisor as it relates to the student's area of research (if applicable). Over 20 years experience in the research field. 	
Experimentation on the microorganisms/cell lines/tissues to be used in this study will be conducted at a Regulated Research Institution and was approved by the appropriate institutional board prior to experimentation; institutional approval forms are attached. Origin of cell lines:	
	this study will be conducted at a Regulated Research Institution, which does nat the student received appropriate training and the project complies with ISEF
CERTIFICATION – To be SIGNED by the QUALIFIED SCIENTIST or DESIGNATED SUPERVISOR	
The QS/DS has seen this project's research plan and supporting documer above. This study has been approved as a (check one) \square BSL-1/ \square BSL-2 s Chang Lee
