Potentially Hazardous Biological Agents Risk Assessment Form (6A)

Required for research involving microorganisms, rDNA, fresh/frozen tissue (including primary cell lines, human and other primate established cell lines and tissue cultures), blood, blood products and body fluids. SRC/IACUC/IBC approval required before experimentation.

Emily Awad	
Title of Project EFFECT OF EXTROCEILU To be completed by the QUALIFIED SCIENTIST/DESIGNATED SUPERVISIONED SUPERV	of Transepithe II a Feet and Resistant ser in collaboration with the student researcher(s). All questions
are applicable and must be answered; additional page(s) may be atta	ched.
ECTION 1: PROJECT ASSESSMENT I. Identify potentially hazardous biological agents to be used in this experience each microorganism. Caco-2 cells.	riment. Include the source, quantity and the biosafety level risk group of
2. Describe the site of experimentation including the level of biological construction of School of Medicine.	ontainment. 386-1
Describe the procedures that will be used to minimize risk (personal procedure).	rotective equipment, hood type, etc.).
Cascoct. gloves. BSL-1 culture hoved	
4. What final biosafety level do you recommend for this project given the	e risk assessment you conducted?
BSL-1	
5. Describe the method of disposal of all cultured materials and other po	tentially hazardous biological agents.
Per NYU Winthrop Horiptal protocol SECTION 2: TRAINING	
What training will the student receive for this project?	
perform in a BSI-1 lab	
Experience/training of Designated Supervisor as it relates to the stude	
SECTION 3: For ALL CELL LINES, MICROORGANISMS AND TISSUES – To be SUPERVISOR - Check the appropriate box(es) below: Experimentation on the microorganisms/cell lines/tissues to be used in this conducted at a (check one)BSL-1 orBSL-2 laboratory. This study has experimentation.	study will NOT be conducted at a Regulated Research Institution, but will be been reviewed by the local SRC and the procedures have been approved prior to
and appropriate institutional board prior to experimentation; institutional appropriate institutional appropriate institutional appropriate institutional board prior to experimentation; institutional appropriate institutional appropriate institutional board prior to experimentation; institutional appropriate institutional approp	study will be conducted at a Regulated Research Institution and was approved by oproval forms are attached. UC/IBC approval
Experimentation on the microorganisms/cell lines/tissues to be used in this pre-approval for this type of study. The SRC has reviewed that the student r	study will be conducted at a Regulated Research Institution, which does not require eceived appropriate training and the project complies with ISEF rules.
CERTIFICATION - To be SIGNED by the QUALIFIED SCIENTIST or DESIGNA	ATED SUPERVISOR
The QS/DS has seen this project's research plan and supporting documentation	on and acknowledges the accuracy of the information provided above. This udy, and will be conducted in an appropriate laboratory.
