

# Sarah Keane "Examining the Effects of Membrane Stress and Defects in the Lipoprotein Processing of Rules Wizard Acinetobacter bay lyi sint

## **SUMMARY**

These documents require Adobe® Acrobat Reader, which is a free download from the Adobe® website.

The answers you gave to questions on the previous pages of the Rules Wizard indicate that you need to download the following forms in order to adhere to the International Rules:

# These three forms are required for all participants:

- · Checklist for Adult Sponsor (1)
- · Student Checklist (1A) and Research Plan
- · Approval Form (1B)
- Official Abstract Form (87 kb) -- Some fairs may require the use of the ISEF
   Official Abstract Form; others may have their own required format. Please
   contact your regional fair for more information. Note: ISEF finalists do not fill
   out this abstract form they have to fill out their abstract on-line. Please read
   the instructions for completion thoroughly.
- Regulated Research Institutional/Industrial Setting Form (1C) (28 kb) -- This
  form must be completed by the scientist supervising the student research
  conducted in a regulated research institution (e.g., university lab, medical
  center, NIH, SSTP, etc.) or industrial setting. A Research Institution Approval
  form may need to be supplied by the research site (i.e. IRB/IACUC/IBC).
- WARNING: You indicated that your experiment is located at home or at school and that it includes microorganisms, rDNA, or human or animal tissue. The International Rules state that experiments involving potentially hazardous biological agents ARE PROHIBITED in a home environment. A risk assessment must be conducted prior to experimentation to determine the appropriate level of biosafety containment. This assessment will affect whether the research may be done in the school laboratory or whether it must be conducted in a regulated research institution. Please see the International Rules for a complete explanation.
- Qualified Scientist Form (2) (41 kb). May be required for research involving human subjects, vertebrate animals, potentially hazardous biological agents and DEA-controlled substances. Must be completed and signed before the start of student experimentation
- Risk Assessment Form (3) (16 kb) -- Required for projects using hazardous chemicals, activities, or devices or DEA-controlled substances.

 Potentially Hazardous Biological Agents Form (6A) (30 kb). Required for research involving microorganisms, rDNA, fresh/frozen tissue (including primary cell lines, human and other primate established cell lines and tissue cultures), blood, blood products and body fluids.

THESE FORMS ARE NOT TO BE ELECTRONICALLY TRANSFERRED TO Society for Science & The Public. THE FORMS MUST BE COMPLETED BY THE APPROPRIATE INDIVIDUALS, SIGNED AND COPIES SUBMITTED TO your science fair for local, regional or state competition.

Clear & Restart

### Society for Science & the Public

Society for Science & the Public (Society) is a champion for science, dedicated to expanding secondic literacy, effective STEM education and scientific research. We are a proportion of 501(c)(3) membership organization focused on promoting the understanding and appreciation of science and the vital role it plays in human advancement. To inform, educate, and proping.

Since, 1921, the Society Hormerly known as Science Service) has conveyed the exclument of science and research directly to the public through our award-winning publications and world-class science education competitions.
