Potentially Hazardous Biological Agents Risk Assessment Form (6A)
Required for research involving microorganisms, rDNA, fresh/frozen tissue (including primary cell lines, human and other primate established cell lines and tissue cultures), blood, blood products and body fluids. SRC/IACUC/IBC approval required before experimentation.

Student's Name(s) Jingyue Zhang	
Title of Project Treating Post-HIV Infection Through Molecular Targ	get of HIV TAT and PKC Regulation with Berberine and Curcumin
To be completed by the QUALIFIED SCIENTIST/DESIGNATED SU questions are applicable and must be answered; additional page	JPERVISOR in collaboration with the student researcher(s). All (s) may be attached.
 SECTION 1: PROJECT ASSESSMENT Identify potentially hazardous biological agents to be used in this group of each microorganism. 	experiment. Include the source, quantity and the biosafety level risk
3T3 fibroblast cells (from mouse embryo) - Biosafe 2. Describe the site of experimentation including the level of biolog	
Lab at an institution; bio-safety hazard containments. Describe the procedures that will be used to minimize risk (personal).	
Utilization of medical latex gloves, goggles, and he 4. What final biosafety level do you recommend for this project give BSL-1	
 Describe the method of disposal of all cultured materials and oth All of the described materials are disposed in haza 	
1. What training will the student receive for this project? Utilization and operation of machines and chemica Experience/training of Designated Supervisor as it relates to the	als associated with this study. student's area of research (if applicable).
SECTION 3: For ALL CELL LINES, MICROORGANISMS AND TISSU DESIGNATED SUPERVISOR - Check the appropriate box(es) below Experimentation on the microorganisms/cell lines/tissues to be used in be conducted at a (check one) ■ BSL-1 or ■ BSL-2 laboratory. This stuprior to experimentation.	
approved by the appropriate institutional board prior to experimentat	n this study will be conducted at a Regulated Research Institution and was ion; institutional approval forms are attached. IACUC/IBC approval
Experimentation on the microorganisms/cell lines/tissues to be used in not require pre-approval for this type of study. The SRC has reviewed to rules.	n this study will be conducted at a Regulated Research Institution, which does that the student received appropriate training and the project complies with ISEF
CERTIFICATION - To be SIGNED by the QUALIFIED SCIENTIST or	DESIGNATED SUPERVISOR
The QS/DS has seen this project's research plan and supporting docume above. This study has been approved as a (check one) BSL-1/ BSL-2	ntation and acknowledges the accuracy of the information provided study, and will be conducted in an appropriate laboratory.
