Risk Assessment Form (3)
Must be completed before experimentation.

(optional form)

Student's Name(s) _KIMBERLY LIAO_

Title of Project _IDENTIFICATION OF A MODEL AGNOSTIC DISEASE DRIVER IN NON-ALCOHOLIC STEATOHEPATITIS; IMPLICATIONS FOR DRUG DEVELOPMENT_

To be completed by the Student Researcher(s) in collaboration with Designated Supervisor/Qualified Scientist:
(All questions must be answered; additional page(s) may be attached.)

1. List all hazardous chemicals, activities, or devices that will be used; identify microorganisms exempt from pre-approval (see Potentially Hazardous Biological Agent rules).

   Mouse liver, SYBR Green PCR Master Mix

2. Identify and assess the risks involved in this project.

   If handled according to the manufacture's directions and procedures are conducted per the guidelines of our institutional Chief Safety Officer, risks are minimal.

3. Describe the safety precautions and procedures that will be used to reduce the risks.

   The student is provided instructions on working in a laboratory from the institutional safety officer. This includes standard operating procedures, use of personal protective equipment and proper disposal of potential biohazards.

4. Describe the disposal procedures that will be used (when applicable).

   Potential biohazards such as excess liver tissue, excess master mix and gloves are disposed in closed containers in marked biohazard bins.

5. List the source(s) of safety information.

   Angion Biomedica Safety Manual

To be completed and signed by the Designated Supervisor (or Qualified Scientist, when applicable):
I agree with the risk assessment and safety precautions and procedures described above. I certify that I have reviewed the Research Plan/Project Summary and will provide direct supervision.

Prakash Narayan

Designated Supervisor's Printed Name   Signature   Date of Review (mm/dd/yy) 6/27/19
